PROFILE

I am a Second Year student in Artificial Intelligence & Data Science (AI & DS) seeking opportunities to apply my technical skills. My goal is to contribute to an organization where I can grow professionally while utilizing my knowledge in data science and programming.

PROJECTS

Interview Resume Checker Portal   **2024**

A web application for resume analysis and job matching using Machine Learning and Natural Language Processing to provide comprehensive insights for job seekers.

- Complete resume analysis and ATS score calculation.
- Job recommendations based on skills and experience.
- JD matching score for application relevance.
- Resume builder with professional templates.
- Detailed resume analysis report generation.

Anti-theft Alarm System (IoT-based)   **2023**

Developed a smart anti-theft alarm system using Arduino Uno, PIR sensor, and GSM module to detect motion, trigger a buzzer, and send real-time alerts via SMS for enhanced home security.

- Motion detection using Passive Infrared (PIR) sensor.
- Real-time alert via GSM module to user's phone.
- Audible alarm system using buzzer.
- Cost-effective and easy-to-deploy for home and small business security.
